1) Introduction

The The Prem Rawat Foundation (TPRF) is a U.S. based public non-profit charity funded by donors from over 50 countries and staffed mainly by volunteers. The foundation describes its mission as: “to address the fundamental human needs of food, water and peace so that people can live with dignity, peace and prosperity.” Since its founding in 2001, the Foundation has participated in a wide range of assistance projects related to food, water and peace in over 30 countries.

TPRF’s primary activities are channeled through three signature programs:

- Message of Peace
- Peace Education Program (PEP)
- Food for People

The focus of this research report is the PEP. In 2007, volunteers from TPRF began bringing videos of Prem Rawat’s international talks on peace to inmates around the world. At the request of prison officials, in 2012 TPRF developed a structured curriculum called the Peace Education Program (PEP), which held its first pilot program in June 2012 at an international business college in Brisbane, Australia.

Since 2013, PEP has been made available to a variety of groups and organizations worldwide. PEP purports to help people discover their inner resources such as strength, choice, and hope, and to explore the possibility of personal peace. The program is now being presented to civic and government groups; colleges, universities, and adult education programs; community groups; hospital and hospice staffs; seniors and retiree centers; parolee and prison rehabilitation programs; and special groups, such as veterans programs.

The curriculum consists of 10 hours of workshop media material focused on a selection of a number of core themes. Each workshop includes several video segments from Prem Rawat’s international addresses and other materials such as animated and video short films. The program provides written materials to support and strengthen the learning outcome of the participants. In each session, time is allotted for reflections and expressions of participants.

The main message of the program is that, while every person has a source of inner peace, many may never explore this innate ability and thus never find it. The Peace Education Program strives to set its participants on a journey to discover this possibility within themselves.
2) Elements of Peace Education Programs

Eight program target groups have been established and operating since 2013. They include the following:

2.1) Civic and Government Groups

PEP has been presented to civic organizations including the following: the Silverton Grange in Oregon; a homeless organization in Porto, Portugal; and civic centers throughout Sao Paulo, Brazil, in coordination with the Secretary of Justice, who also presented PEP for her staff, and the mayor’s office in city hall.
2.2) Community Programs

In 2013 PEP was offered through a variety of community education venues around the world. This includes an educational, library-style cultural facility in Subotica, Serbia; an international community center in Basel, Switzerland; several community centers in the Southern California area, as well as in many other countries. Since then, it has grown to include communities worldwide as diverse as a community center in Liverpool, England; the JCC in Providence, RI; and a library in Malibu, California.

2.3) Correctional Facilities
The Peace Education Program has been integrated into rehabilitation programs in correctional facilities and transitional pre-release centers across six continents. At the invitation of a number of these correctional facilities and PEP students, Prem Rawat has visited prisons and addressed inmates in India, Argentina, United States, and South Africa.

2.4) Education: College, University and Adult Education Programs

The PEP program is available to students around the world. It has been presented as a course within a business program in a college in Australia. As of 2013 courses have been offered in a college in Saskatchewan, Canada; in California State University Northridge (CSUN); and Cozumel University in Mexico. It is also in adult education settings such as AOF, one of largest adult education providers in Denmark; and SCOLA, an Adult Education Center in London, UK.
2.5) Health & Wellness

In 2013, the PEP program was launched for staff and volunteers at Evergreen Hospice in the Seattle, Washington area, then later at the Evergreen Hospital Center. In South Africa, the program was offered at Talisman, a halfway house for the mentally ill. In Adelaide, Australia, PEP programs were offered at Western Hospital and in Panangaa, a community mental health center.
2.6) Parolee Programs

PEP is available for parolees in several locations in Southern California, including Oxnard and Santa Barbara. PEP volunteers are regularly invited to introduce the program at PACT (Parolee and Correctional Teams) meetings in Oxnard and Ventura.

2.7) Seniors & Retirement Communities

There is a growing interest in PEP among senior centers and retirement communities around the world. PEP has been offered to seniors in such varied settings as Sun City, Arizona; Toronto, Canada; Guayaquil, Ecuador; Sydney, Australia, and others.
2.8) Veteran Programs

A PEP pilot program was offered to veterans in early 2013 in Weaverville, North Carolina. Outreach to other veterans associations is in progress.

PEP is seeing rapid global growth.

**PEP has been translated into 10 languages:** Danish, German, Italian, Norwegian, Portuguese (Brazilian and European), Spanish (Latin American and European), Serbian, and Swedish.

Ten more translations are in process: Bosnian, Chinese (Simplified & Traditional), Creole (for Mauritius), Dutch, French, Greek, Japanese, Slovene, and Tamil.

**PEP has been presented on all seven continents now**, including Antarctica. A TPRF volunteer who works at a science research lab in Antarctica is presenting PEP to his colleagues.

The Correctional Education Association (CEA) is adding some PEP videos to its pilot program offering tablet-based courses for inmates. If interested, the prisons will contact PEP to receive the complete program.
3) Survey of PEP Participants and Its Outcome

TPRF believes that peace education has a place in everyone’s life, and that it is especially important to help people who are incarcerated to explore their inner resources, rehabilitate successfully, and return to society as more productive citizens. The Foundation expects the program to bring the following impacts:

- Positive impact on one’s relationships with others
- Development of social skills
- Realizing the choices each person has in life
- Discovery of one’s inner strength
- Becoming hopeful
- The ability to feel contentment regardless of change in living conditions and circumstances

Participants are asked to complete a survey questionnaire featuring both structured and unstructured responses. This report presents the findings of this survey.

3.1) Principal Elements of Program Evaluation

Over the last few years many testimonials and personal letters have been sent to TPRF expressing the views of people who have gone through the Peace Education Program. Several organization officials who hosted the delivery of PEP have reported seeing positive changes in participants. This research study was done to evaluate the feedback from a broad spectrum of participants to represent the whole.

A questionnaire was designed and data has been collected since 2012 from the graduates of the program from various groups and locations around the world. The questionnaire was translated into several of the languages in which the program has been offered, and responses were gathered from people on several continents from January 2013 until the end of April of 2014. Below is a detailed list of locations and regions where surveys were completed:

PEP has spread more widely among the correctional facilities across the world.

83% of the surveys processed (302 out 365) were gathered in 2013 and the remaining 17% were collected in 2014 through April.

**3.2) Summary of the Findings**
As mentioned earlier, the program is expected to bring the following impacts:

• Positive impact on one’s relationships with others
• Development of social skills
• Realizing the choices each person has in life
• Discovery of one’s inner strength
• Becoming hopeful
• The ability to feel contentment regardless of change in living conditions and circumstances
The premise of the program is that, within a set number of weeks, program participants attend a number of classes on a regular basis. During these sessions, they listen to and watch educational videos, express themselves, and develop a sense of where they are going in their lives and where they want to be in the future.

Based on the research, the overall impact of the program is to offer motivation for participants in determining positive ways of seeing themselves in the present and future.

Upon completion of the program, the participants were asked to look back into their experience and answer a series of questions that were directly based on the curriculum of PEP. Two responses are requested for each question: before PEP and after PEP. Their 365 responses are summarized below.

3.2.1) Comparing Impressions from Before the Start of the Program and After Its Completion

The above chart shows a tremendous improvement over the course of the education with regard to believing that reaching and feeling peace is a possibility in the lives of the respondents. In the beginning less than 42% believed that feeling peace was a possibility for them. After the program was over, almost 100% believed that it was a possibility. Indeed, three quarters of them (74.3%) strongly feel that peace is a possibility in their lives.
The above question asked the participants to look more deeply into the inner resource of appreciation. The outcome shows a tremendous improvement from a total of less than 50% who agreed or strongly agreed with the statement before the PEP to more than 98% upon completion of the program. The greatest improvement occurred in those who strongly agreed with the statement from a mere 5.8% in the onset of the program to almost 70% upon completion of the program.

Being aware of one’s inner strength is one of the principal objectives of the program. The above chart shows that upon completion of the program almost every participant (98.9%) said that they were aware that they have the inner strength, which they can draw from when they need the help in their lives.
Being more consciously self-aware is another important objective of the PEP. Almost everyone who participated in the program (98.6%) said that by knowing their inner strength and resources they can become more self-aware and live their lives more consciously. The improvement in this area was impressive and showed a surge from a total 46.7% in the start of the program. Upon completion of the program, more than three quarters (75.7%) said that they strongly agreed with the statement as opposed to a mere 7.5% in the beginning of the program.

The above question asks the participants to assess their ability to reach clarity as one of their inner resources and assess the impact of reaching this state of mind in dealing with their day-to-day life. The response of the participants shows that this was one of the most challenging aspects for many when they started the Peace Education Program. Only 2.2% said that they strongly agreed with this statement. Another 28.7% said that they agreed with the statement. Putting these groups together the total percentage of the respondents who agreed with having such awareness before the PEP was about 30.9%, less than a
third of the participants. Upon completion, the total percentage of those who either strongly agreed or just agreed reached 94.8%, showing a significant improvement. In fact, 66.9% said that they strongly agree with the statement.

The above chart shows that many respondents were challenged to distinguish between belief and knowledge before their PEP experience. Only 11.1% said that they strongly agreed with this statement when they started the program. Another 35.5% said that they agreed with the statement in the onset of their educational program. Upon completion the level of those who strongly agree reached 63.1%, a six-fold increase. In total upon completion of the program, some 96.4% of the respondents said that they understood the difference between believing and knowing something from their own experience.

PEP aims to convey that appreciating simply being alive, regardless of one’s circumstances, is a valuable inner resource. Only 9.7% of the respondents stated that they could strongly agree with the statement when they began the program. Upon completion,
67.9% (more than two thirds of the participants) strongly agreed that they could recognize that there is an innate dignity in being alive regardless of their own circumstances. Indeed almost all (97.6%) either agreed or strongly agreed with the statement upon completion of their peace education.

PEP aims to increase awareness of the individual power and the freedom to make one’s own choices and thus influence one’s wellbeing. This understanding reflects one’s individual responsibility for peace and contentment. Only a small percentage of the respondents (17.4%) strongly agreed that they recognized this when they started this program. This ratio increased to almost 80% of the participants upon conclusion of the program (four out of five). Overall almost all (96.7%) of the participants stated that they agreed or strongly agree with this statement at the end of the program.

PEP aims to increase participants’ sense of hope as one of the most vital inner resources when dealing with challenges in life. Initially, just about one out of ten of the respondents
said that they were in strong agreement with the statement and understood that they have a power of hope within themselves. Upon completion of the program, the rank of participants with a strong level of understanding increased to three quarters of all who participated and responded to the questionnaire. In fact, upon completion of the program, 97.5% of the respondents said that they either agreed or strongly agreed with the statement that they understand that hope is an inner resource that they can draw on to help them live through challenging times in their lives.

PEP aims to increase its participants’ ability to experience contentment even in difficult times. Only 4.7% of respondents said that they strongly agreed with this statement in the beginning of the program and 29.6% said they agreed. Upon conclusion of the program the total percentage of those who either strongly agreed or just agreed with this statement reached 93.7%, out of whom 66.9% (two out of three respondents) strongly agreed with the statement.

The positive change between before and after in the distribution of responses presented above is obviously very significant. Further analysis tracks these changes by respondent. For each respondent, the average before response and average after response were calculated. The following is a cross tabulation of these averages.
We see that some respondents reported before scores that were Low (1 – 1.99), some in the Mid-Range (2 – 3.99), and some High (4 – 5). 95% of all ended High. 29% started at less than 3. No one ended less than 3. To have an average score of 5, the respondent must answer 5 to all 10 questions. No respondent had a before average of 5 but 30% had an after average of 5.

The difference between the before average and after average for a respondent indicates the program impact for that person. However, since respondents began at different places, the numerical value of the change may be misleading as an indicator. A change from 2 to 5 and a change from 3 to 5 are both very significant. To normalize these values for statistical purposes, a PEP Impact Index (PII) was calculated for each respondent as the change divided by the headroom. In other words:

$$\text{PII} = \frac{\text{After avg} - \text{Before avg}}{5 - \text{Before avg}}$$

PII measures, as a percent, how much of the potential improvement was achieved. Thus, a change from 2 to 5 and a change from 3 to 5 both have the same PII, namely 100%. If a respondent started at 1, and ended at 4.2, the PII is 80% (3.2 / 4). A respondent who started at 3 and ended at 4.6 also has a PII of 80% (1.6 / 2).

The following chart shows the frequency distribution of the PII scores for all respondents vs. a hypothetical normal distribution of the same scores.

Any variance from the Normal Distribution is "interesting" statistically speaking. Here the variance is very interesting indeed.
TPRF might have been pleased with the Normal Distribution result as shown here – an average PII of 50%, with higher and lower scores distributed as one might expect. That would be a very good thing on the issues measured here, and especially for a population that includes many correctional inmates, a situation that is obviously challenging for the topics being measured here.

However, the actual distribution is dramatically better than Normal. The mean (average) is 80%. The median (middle point) is over 80%. The mode (most frequent result) is 100%. This chart is perhaps the clearest indication that the impact of PEP is felt by its participants as deeply and powerfully positive on the survey form topics.

3.2.2) Demographic Findings
The following charts show some of the most salient demographic information about those who participated in the program. No significant variations in the before/after results were observed across demographic differences.

The above chart shows that a large number of the respondents were unemployed during the course of the program. This should not come as a surprise as a significant number of the respondents were in prison.
By comparison there were more males than females who took the program and participated in the program evaluation.

It is interesting to note that 13.70% of the respondents had a college degree and indeed 9.06% of the total had a postgraduate qualification. More than a quarter of the respondents did not graduate from high school.
The largest proportion of the respondents, 50% of the total, were 26 to 45 years of age. There was a noticeable proportion of people over the age of 56 (19.1%). On the other hand, more than 15% were in the youngest age bracket of 19 to 25.

### 3.2.3) Take Away from Open-Ended Questions

The questionnaire had three open-ended questions. They were: What participants liked most about the program; what they would like to see improved; and any additional comments they wished to make.

Responding to open-ended questions usually indicates the level of importance that survey respondents place on a specific survey. It is interesting to note that there were hundreds of open-ended responses. We have taken each segment and placed them in the appendix of this report. They are in verbatim form and may contain spelling or grammatical errors. The statements are, however, very rich in content and clearly convey the messages of their writers.

4) Conclusion and Ideas for the Near Future

The survey results suggest that the program succeeds in delivering a message of peace and in having a positive impact on the state of mind of the program participants. No significant variations in these findings were observed across demographic differences. In sum, the following conclusions can be reached:

- Participants found the program helpful in discovering inner resources that most had not been aware of.
- Participants understood that they have the choice to be successful and to live in peace, regardless of their existing life circumstances.
- Participants discovered the power of hope and of being hopeful in life.
- Participants realized the gift of being alive and the dignity of life, regardless of circumstances.
- Participants discovered the difference between believing and knowing something in life.
- Many participants expressed that their lives would have been different if they had benefited from this education earlier in their lives.
- Many want the program to be extended to many other places to reach a much larger number of people in other organizations, places and locations.
- Most respondents were grateful for the program and did not express a need for program changes.
- Proposed changes included making PEP accessible to people who speak different languages.
- Many believed that their lives will be better and that what they learned can help them in their lives and work.

Suggestions:
- For the most part, the program seems to be optimal for a variety of audiences.
- There is great potential to expand the program and offer it in many more places of different types.
- The program seems to have a positive impact, regardless of the existing socio-economic or demographic conditions of the program participants.
- There are good ideas and suggestions in the comments of the respondents. Paying close attention to them can be valuable to the organizers and to future PEP participants.

Q3: Is there anything about the Peace Education Program that could be improved?
-10 weeks of videos were a bit too much. Maybe some breaks of interactive sessions, btw weeks would have been better. Real life situations for coping mechanisms.
-A bit of variety in format. Start class with short discussion of the reading.
-A debrief/ share thoughts at end of workshop or 10 min. of start.
-A short break halfway through the session will be productive
-A summary of main points for each topic? A little more detailed than in the workbook.
- Add a little more spirituality (Christianity, Buddhism, etc.)
- Add one more person who knows multi-languages so we can help those who doesn’t understand English.
- All inmates to undergo this programme. Easy access to the programme for any one willing to participate.
- Allow for more time for discussion, maybe in small groups, as I felt many in the class had experienced painful times that they might have benefitted from sharing.
- An earlier time
- An interpreter for one of local languages. Shooting photos to can show people for their interest. More people must be selected for the spread of this peace message.

-Just give it time to learn inner peace & inner strength & self awareness
-Karakia conducted prior and after programme.
-Keep it up. More of the same.
-Maybe communication to those who don’t really understand English.
-Maybe more interaction. More people worldwide need this programme. Provide souveniors
-Maybe more sharing of personal thought. Also talk about ways to aply the lessons Prem is teaching.
-Maybe a slight discussion after each DVD to clarify content, optional.
-Maybe could be a weekend workshop or 2 hrs for 5 wks
-Maybe for the facilitators to speak-out a bit more. Support and encouragement.
-Maybe there could be a second set of 10 studies, a phase 2 if you will
-Maybe if this Peace E/P could be twice a week. And for now everything is OK especially about our leaders.
-More cartoons
-More discussion – group
-More examples – relating to our daily lives so that there was more understanding & clarity for guys like me.
-More feedback. More interaction with us
-More input from the instructor may cause a more positive response from the class!
-More input from the teachers of there views and opinions of the videos.
-More papers to be answered each session. Innervation of other languages. More paper work
-More peaceful room, less noisy class next door.
-More responses from group
-More sharing with participants to make it more concrete (with life experiences & examples).
-Only listening to the video can sometimes be boring and lacks interactivity.
-More talking between video’s about subject topic.
-More time to discuss his ideas
-More videos & class time. Computer access for inmates

- No, I think it was perfect the way it was
- No, I think Peace Education Programme is needed to be listened clearly & practice what Mr Rawat has taught us people.
- No. I think their teaching skills is good, or they must increase the duration of the course because this course is good for us.

- Nope. Its been fantastic
- N/A. It is good how it is.
- Not at all
- Not at all because is teaching about how life is important and I must apreciate in future.
- Not at all unless you want to do another programme with more, which you just told me could be happening.
- Not at this time I do not believe
- Not one thing.
- Not really
- Not sure
- Not that I can think of. Thank you.
- Not that I could bring to mind.
- Not that I know of
- Nothing.
- Nothing at all.
- Nothing. I just wish there was more study material.
- Nothing it’s great
- Nothing. I was satisfied because it taught me a lot and wish to see it continuing to change me and other people’s lives.
- Nothing it’s great
- Nothing. Just if we could have more courses.
- Nothing needs to be changed, just may be follow up at a latter stage.
- Nothing
- Nothing that I can currently think of…it was a great class
- Nothing that I can think of.
- Offering more practical example and method for reaching peace and contentment.
- Organizationally a bit haphazard at times. Time-management wasn’t always on-point. Could be a bit repetitive.
- Other languages. Everyday on TV. More student/teachers.
- People should be made aware that this class is for personal growth & not just a certificate. More people or inmates should be able to attend this programme
- Perhaps just that the volunteers add more structure and encourage more in-depth group discussions
- Perhaps questions as “prompts” for discussion in Reflection times. More space to take notes. The animated stories (the animation part). It would be helpful to know the date or year of each video.
- Physical interaction - Public/Prem Rawat
- Please make the subtitles larger & easier to read
- Prem Rawat should pause less in his videos
- Prem Rawat’s voice—lol. No it’s fine
- Put one motivation speaker every session. 15 workshops because I feel there is much more to learn. Make answering material to be filled each workshop
- Reach more people. It’s extremely important
- Show it more
- Show more jail videos so guys will relate to other people
- Since I attended the course in prison, I felt that the time was not enough and that the course should be done more often.
- Some interactive elements would be useful. Ideas about exactly how to look inside for people with no experience of doing this
- Some of the DVD have poor sound quality.
- Sometimes unsure of the relationship of cartoons/ side pieces to main lecture topic. Redundant at times, think that 10 weeks not necessary
- Support groups or test just to prove and make sure we understand homework that we can answer to.
- Translator for African languages. Attended daily. PEP must be made available in rural areas.
- Too get somebody to interpret for the people who don’t understand English.
- That maybe they could do some of the videos more often. Maybe they could do it in more of the other countries than just USA.
- The audio. More info on some of the concepts.
- The biggest adventure that you finding you house
- The duration of the course is too small.
- The lack of teaching skills
- The language
-The people interviewed. Better examples.
-The presentation: some topics of the 10 are not well presented (in my opinion). I am not sure anymore which one could be “Understanding” and “Dignity.” The sections within both topics are not well sequenced, connected.
-The program is wonderful. Hope more people get to participate in it, students including.
-The program should be spread to other areas of life - prisons - schools - workplace - retirement villages
-The programme was facilitated very well. So for me nothing to improve
-The talk on Hope. I still don’t know what hope is.
-Things that we are passionate about and use it as a skill. Development and train ourselves of how to be self-employed. Empowered out it and the community as a whole. Parenthood if you are in prison.
-Translation must be done in other languages, not only in Zulu. It also need more animated stories.
-It was facilitated very well. So for me nothing to improve.
-There are place is poor communities that will also benefit from this program.
-There should be a continuity of the program. There should be more sessions during the program.
-There should be only the translation voice.
-There were a lot of disruptions during the course. Planning with the Social Worker must be done properly to avoid them.
-There’s no anything about the Peace Education Programme that could be improved.
-Things are better on the big screen – DVD to be viewed by overhead. Before and after every workshop open up a Q/A session or to comment. Feedback on the first assignment – facilitator/social work to do one on one counselling.
-This is a program of excellence
-This program is very improved how is basics for us. I wont change nothing.
-This programme should be advertised through media and social network & television at least for 30 minutes every morning
-This question shouldn’t be here!!!
-Thoughts. Love. Kindness
-Time to be shortened maybe two weeks, as in prison there are so many random involvement. The course content was perfect
-To allow participants to speak about their experiences in life and how they overcome their difficulties.
-To be improved I think is time because once a week is not enough to learn more about it. My life it complete change now.
-To do more promotional advertising
-To get the information out in the world. Because of hospice, we were blessed.
-To include God the Creator.
-To let anyone to read what they wrote after reflections. It will help take out the shyness of some.
-To me its fine the way it is.
-To my concern everything is OK. In addition I suggest you must make copies for CD’s for learners.
-To my side Peace Education Programme it does need any improvement, is already good.
-To Prem Rawat: shorter talks, less repetition, work on a “peaceful” voice, adapt the examples; quite many repetitions, kind of boring. More interaction, more dialogue.
-To reach the homeland. To enterprete. To establish a team that can reach the rural area
-To speak about peace is like speaking about equality. Freedom “to be well with myself and others”. There should be more time for workshops about peace.
-To the knowledge I got from the programme, I think this programme is fine but it would be nice to see Mr Prem Rawat in our own eyes in this facility.
-Translation in Spanish (subtitles).
-Understanding – peace - hope - every day matters - choice - knowing and believing
-Videos could be a little more interactive. Lecture style speaking could be softened. Familiar with most concepts, but found it a bit repetitive at times
-We could bring in more students to learn this program. We could also create more awareness of this program. Appoint some more inmates to assist in the facilitation of the program.
-Well for me the Peace Education Programme has everything one should have in his/her life. Know need to be improved
-Where to go from here - you are turning on a light in people’s lives, they need support & encouragement to keep it going. Perhaps encourage social element to continue after the program?
Point out different directions for exploration.
-Would be good to understand more on how to achieve these desirables.

-Yes, more time if we could attend the course for more weeks, I think we can learn a lot more from Prim
-Yes more videos and more volunteers to get the program to more people
-Yes never to attack peoples spiritual convictions and faith. But to stay unique in bringing out the inner-qualitys in persons hearts, don’t judge or fight spiritual convictions. Cause Prem Rawat has been bless by God with a unique gift in explaining the supernatural.
-Yes. Really has improved my feeling and knowledge, Dignity, Self-Awareness in my life.
-Yes. Testimonys
-Yes. The dangers of hasty decision. Social justice. Divine teachings or guidance.
-Yes: the engagement between the facilitators and student. There must be a lot of communication.
-Yes, to always encourage other peoples the important of peace in our life
-Yes: who created this. People must know the creator. African language must be for more understanding.
-You are doing a great job!
-You can keep on teaching many people in other place – school, church, etc. Keep on doing good job.
-You improve peace, you improve happiness and joy, love and clarity
